# Murata Electronic Components List

2025

# High-performance 2-axis (xy) inclinometer

## SCL3400

***muRata***  
INNOVATOR IN ELECTRONICS

**2-axis MEMS sensor offering  
best-in-class stability over  
lifetime and temperature range**

### Applications

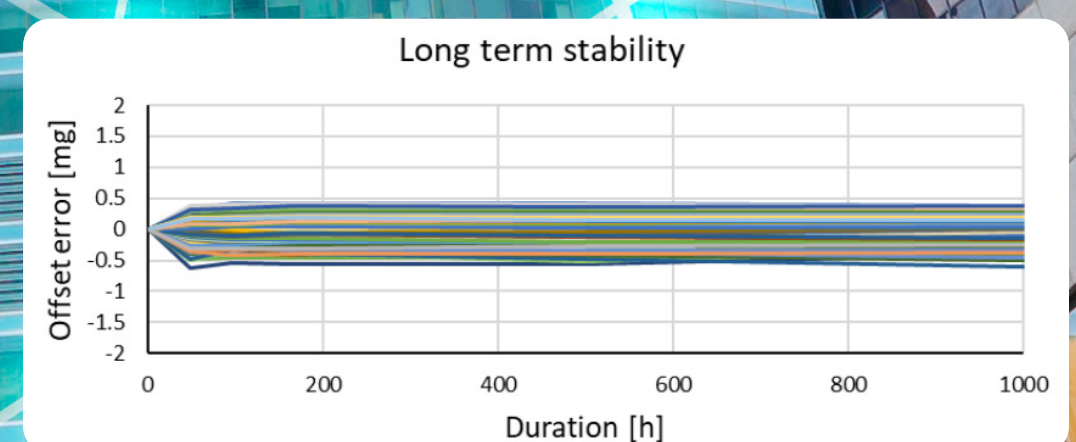

- Structural Health Monitoring (SHM)
- Leveling & Platform Stabilization
- Tilt sensing
- Inertial Measurement Units (IMUs)
- Positioning and guidance systems

### Features

- Single package 2-axis High Performance inclinometer sensor
- Based on Murata's proven 3D-MEMS technology
- Extremely stable output over wide range of temperature and vibration
- 3.0V - 3.6V supply voltage
- Two user selectable measurement modes:  
±30° (0.5 g) with 10 Hz LPF  
±90° (1.1 g) with 40 Hz LPF
- Advanced self-diagnostics features
- 12 pin pre-molded housing, suitable for SMD mounting
- Size 8.6 x 7.6 x 3.3 mm (l x w x h)
- Compatible with RoHS and EV directives

### Performance

- Ultra-low noise density 16  $\mu\text{g}/\sqrt{\text{Hz}}$
- Typical offset drift over lifetime  $\leq 0.05^\circ$
- Sensitivity error  $\pm 0.7\%$
- Temperature range  $-40\ldots+85^\circ\text{C}$
- Resolution up to 32768 LSB/g

# High Performance Gyro Sensor + Accelerometer

## SCH16T-K01

### Applications

SCH16T is targeted at applications demanding high performance with tough environmental requirements.

- Typical applications include:
- Inertial Measurement Units (IMUs)
- Navigation and positioning
- Machine control and guidance
- Dynamic inclination
- Robotic control, Drones and UAVs

### Features

- Single package 6DOF component
- Cross-axis calibration enables better than 0.15 ° orthogonality error
- Gyro bias instability level down to 0.3 °/h
- Gyro noise density level down to 0.0004 (°/s)/√Hz
- Stable offset and sensitivity over full temperature range
- Excellent linearity and vibration performance
- Extensive self-diagnostics features utilizing over 200 monitoring signals
- ±300 °/s angular rate measurement range
- ±8 g acceleration measurement range with default dynamic range of ±26 g
- 40 °C...+110 °C operating temperature range
- 3.0 V...3.6 V supply voltage
- SafeSPI2.0 interface with 20-bit data frame
- Data ready, timestamp index and SYNC functions for clock domain synchronization
- RoHS compliant robust 24-pin SOIC housing
- 11.8 mm x 13.4 mm x 2.9 mm (l x w x h) SOIC-24

Accelerometer, Sensitivity error over temperature in %

# CO2 Sensor

with High Accuracy  
& Long-term Stability

Hight accuracy using unique algorithm  
and long-term stability using automatic  
calibration

## Applications

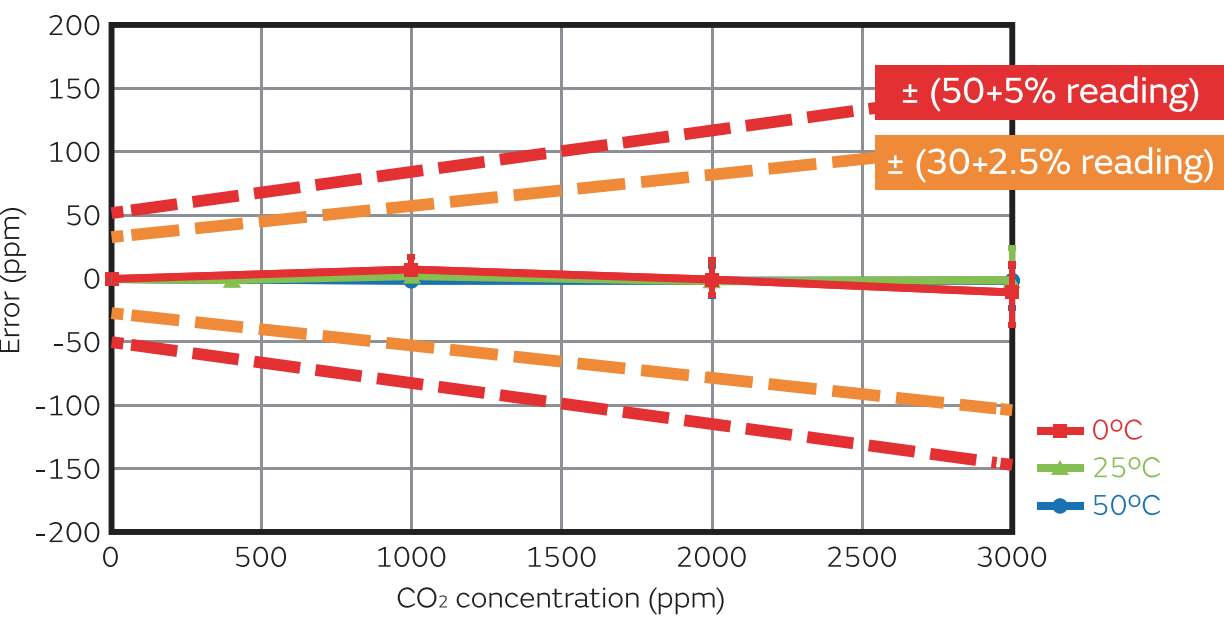

- Smart agriculture**  
Promotion of photosynthesis by CO2 concentration control in greenhouse and plant factory
- Building Energy Management System**  
Ventilation control in building

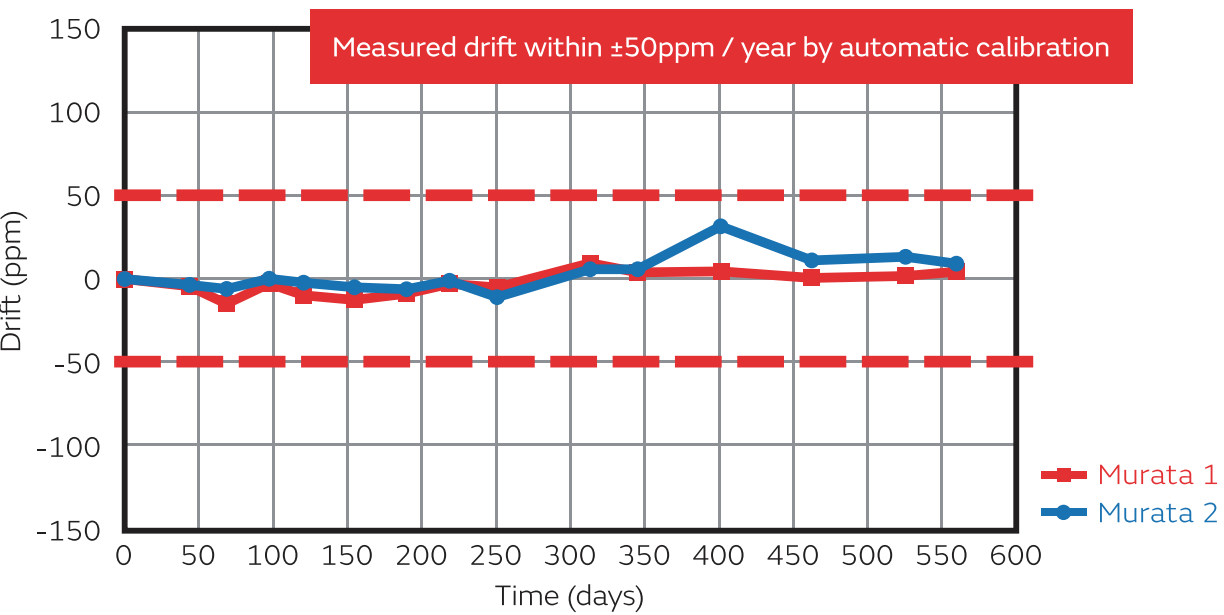

## Features

- Low influence of other gases by NDIR principle
- Excellent temperature characteristics and high accuracy
- Excellent long-term stability and high reliability | by automatic calibration

### Measurement Accuracy

### Long-term Test in Building

Tested by TODA Corp.  
Tested by standard gas@1000ppm (Measurement error included)

## Specifications

| Item                        | Specifications                                     |
|-----------------------------|--|
| Operating temperature       | 0 to +50°C   |
| Measurement range           | 0 to 2,000ppm, 0 to 3,000ppm                       |
| Accuracy                    | $\pm (50\text{ppm}+5\% \text{ of reading})$        |
|                             | Typ. $\pm (30\text{ppm}+2.5\% \text{ of reading})$ |
| Long-term stability (Drift) | $\pm 50\text{ppm / year @1000ppm}$                 |
| Power input                 | AC / DC24V, DC12V                                  |
| Peak power consumption      | Avg. 0.5W / Max. 2.0W                              |
| Outfit interface            | Analog 0~5V  |
| Dimensions                  | 67×92×20mm   |

# Soil Sensor

Murata will continue to make efforts to realize global SDGs by utilizing its unique sensing and wireless technologies.

**Soil Sensor**  
High Accuracy  
EC Sensor by unique  
circuit and algorithm

## Features

- 3 Sensors:  
EC, Temperature, Moisture in 1Unit 132mm

## High Accuracy EC detectionby unique circuit and algorithm

- Elimination of uncertainty by multi-pattern measurement using nine electrodes

- Measurement of ion concentration in pore water

## Specifications

| Power Supply Voltage | Consumption Current | EC Measuring Range | Moisture Measuring Range | Temperature Measuring Range | Dust and Waterproof | Interface                       |
|----------------------|---------------------|--------------------|--------------------------|-----------------------------|---------------------|---------------------------------|
| 3.0~6.0V             | 50mA(Max)           | 0~5dS/m            | 0~60% (in soil)          | -20 to+60°C                 | IP68                | UART, RS232, RS485, RS485Modbus |
| 9.6~16V              | 15mA(Max)           |                    |                          |                             |                     | SDI-12                          |

- To improve yield of crops in W/W
- Sustainable Agriculture in W/W

- To prevent ground water pollution
- Efficient use of water in agriculture

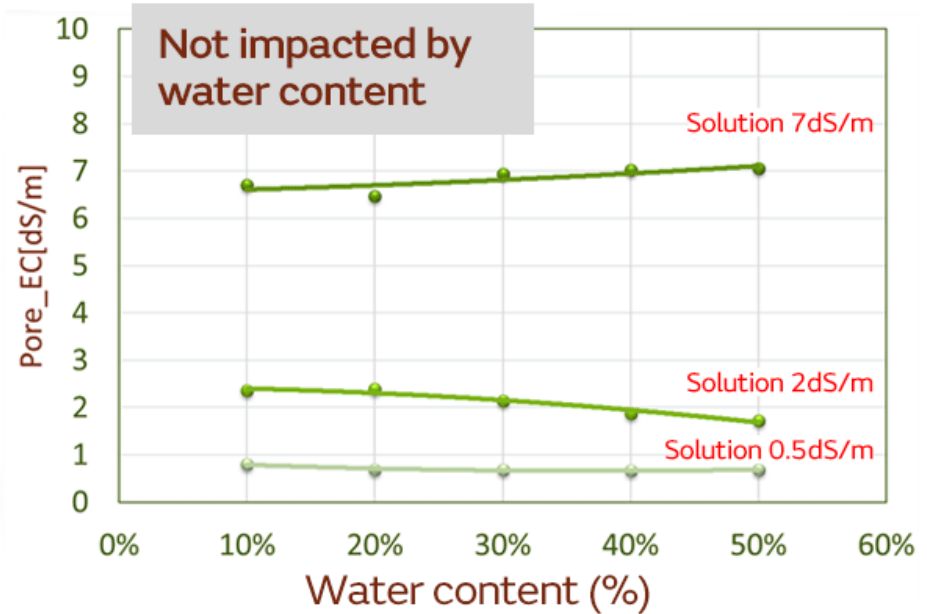

- Soil condition restoration
- Maintenance of forests and ecosystems

# Vibration Sensor Device

PKGM-200D-R

Available to prediction of production equipment trouble by analyzing vibration. Suitable to install Factory Automation component by small SMD device. High frequency vibration detection (up to 11kHz) to contribute preventive maintenance for early stag failure of Bearing etc.

## Features

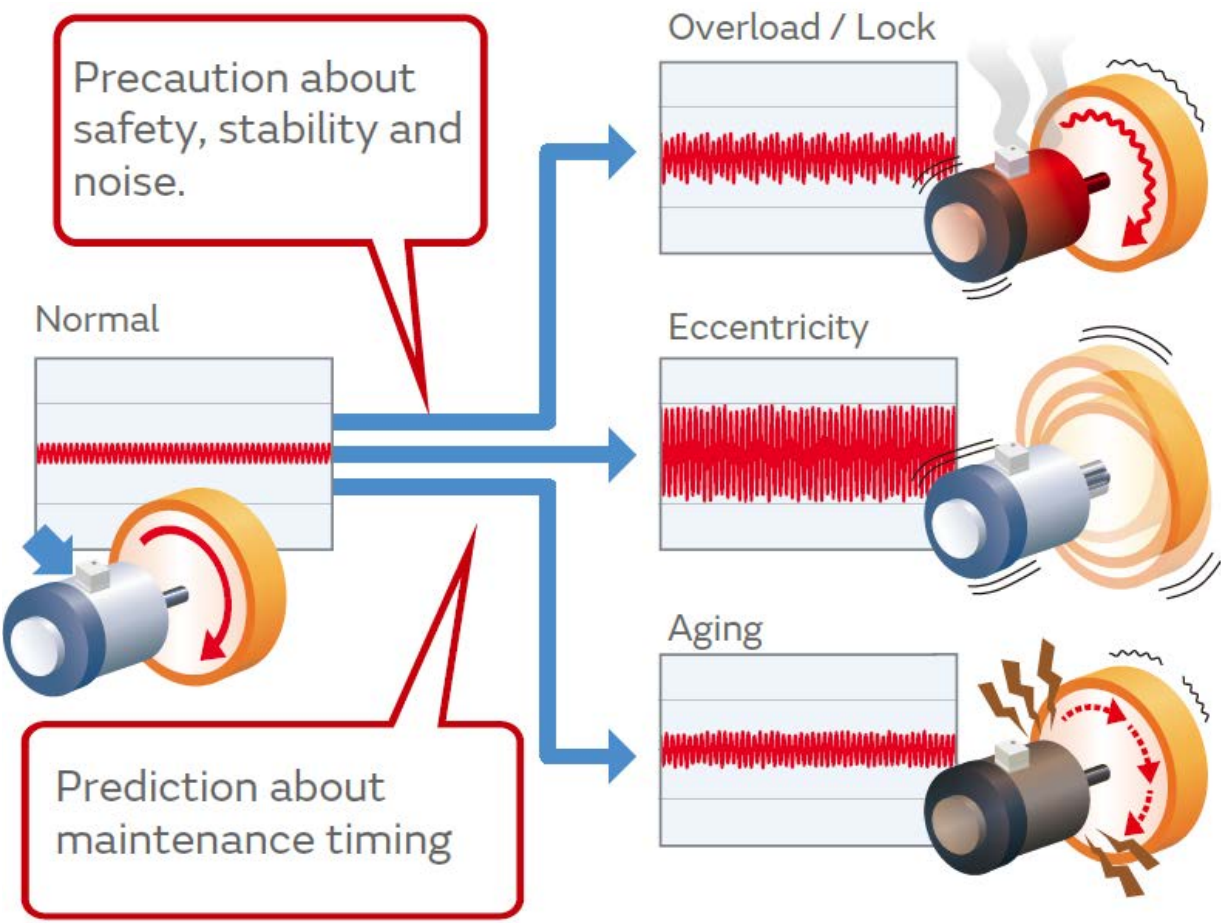

- Available to detect Z axis vibration in wide frequency range
- Including driver circuits
- Differential analogue output for cancelling line noise
- With temperature sensor

## Applications

## Motor Application

## Specifications

**Dimensions:** 5.0 x 5.0 x t3.5mm  
**Construction:** SMD device with 7 terminals with acceleration and temperature sensor

| items                                | unit   | Typical value               |
|--------------------------------------|--------|-----------------------------|
| Output                               |        | Differentials analog output |
| Detection angle                      |        | Z axis                      |
| Supply voltage                       | VDC    | 3.0 to 5.2                  |

# MEMS Ultrasonic Transducer pMUT

Piezoelectric Micromachine  
Ultrasound Transducer

## The smallest MEMS Ultrasonic Transducer

### Applications

- Measure the distance of up to 6m by Time-of-Flight technology
- Independent of color, light and target's transparency
  - Object detection
  - Human detection
  - Distance detection

### Specifications

- Size: W2.8mm×D2.3mm×t0.81mm (Acoustic port size 0.6 mmΦ)
- Field-of-View (FOV) of up to 180 degrees
- User-friendly frequency 40kHz

### Features

- Excellent design flexibility and solderability as the same way as MEMS Microphone
- Extremely Low power consumption ( $\mu\text{W}$ ~)
- Enable both Transducer and Receiver
- Higher Sound Pressure Level /SPL(90dB)  
\* Condition: 6Vp-p, sine wave, at distance of 15cm)
- If the application has an audio circuit which pMUT frequency can be detected, there is no need to set additional receiver

# UWB Modules

Wireless communications

Ultra-wideband (UWB) technology provides a highly effective means for providing secure and precise distance measurement

**Benefits:**

- Smallest/highly integrated UWB module available in the market
- 75% less square area than CoB solution
- Frequency, Tx power and Antenna delay are calibrated for each device
- Support Multi Antenna design and evaluation

Type 2BP  
NXP

- Ultra small UWB module which includes NXP's SR150 UWB chipset, clock, filters and peripheral components
- 3 Antenna support (3D AoA or 2D AoA support)
- UWB Chip set: NXP Trimension SR150
- Antenna: External

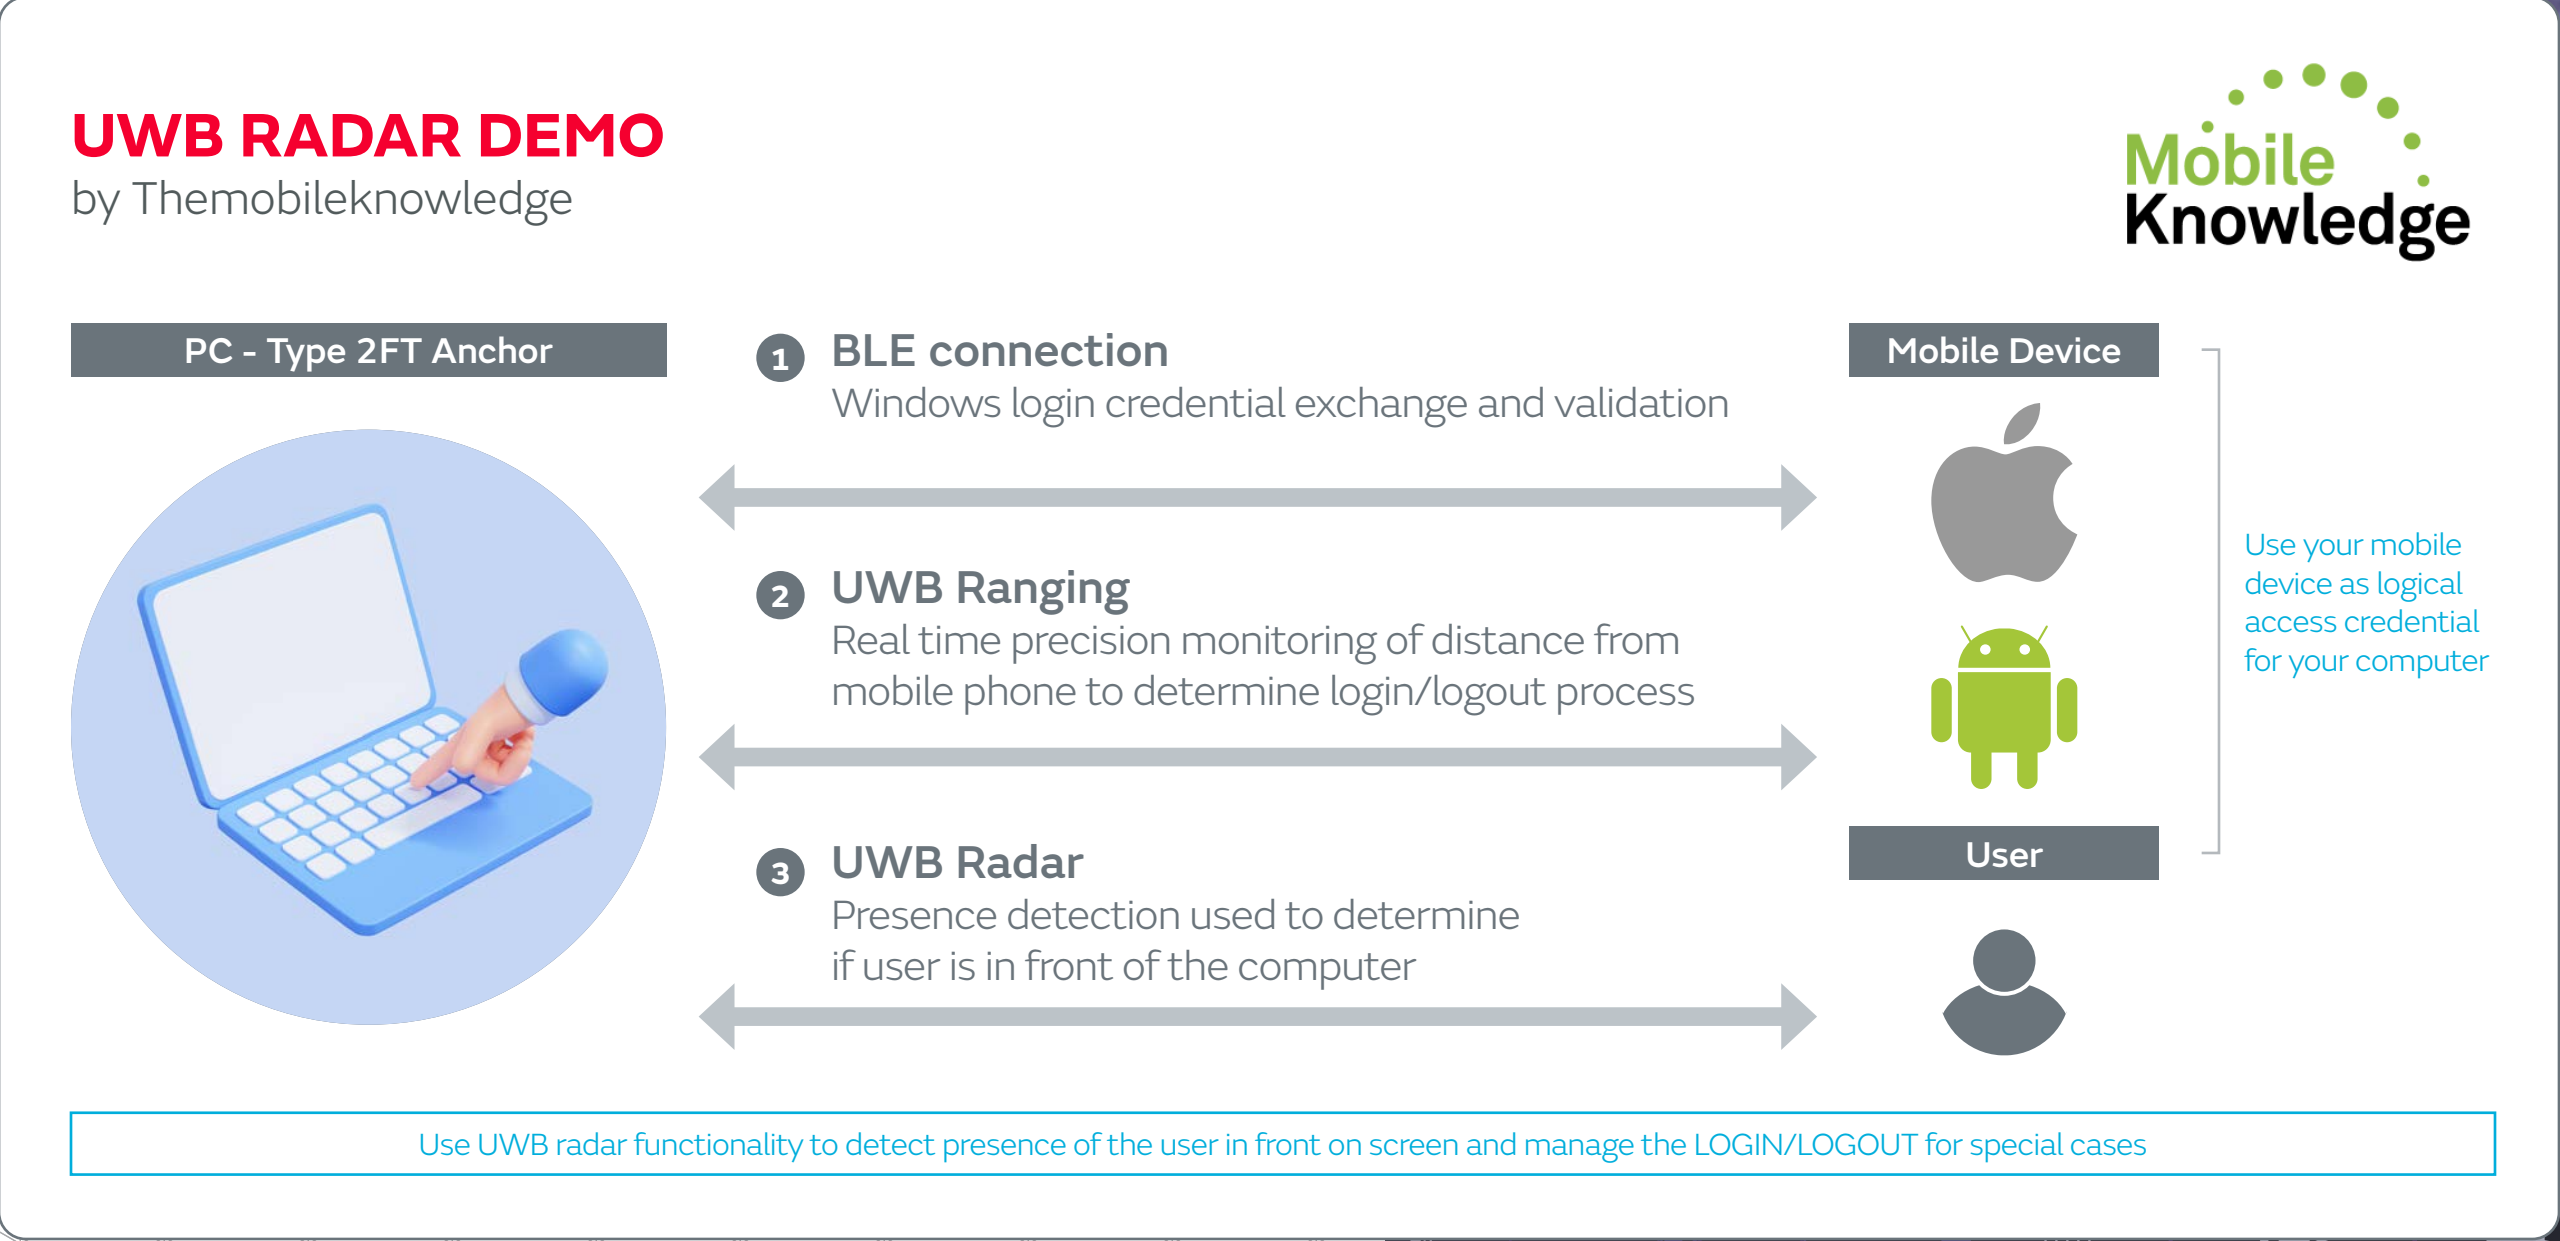

Type 2DK  
NXP

- All-in-one UWB + Bluetooth LE combo module which integrates NXP Trimension™ SR040 UWB Chipset, NXP QN9090 Bluetooth LE + MCU chipset, On board antenna and peripheral components.
- Ideally suited for UWB Tag/Tracker which operates by coin-cell battery, and general IoT devices.
- UWB Chip set: NXP Trimension™ SR040
- Antenna: Integrated

**Features:**

- Ultra-small dimensions
- Lower power consumption
- High quality

Logical access - High level architecture

# UWB+BLE Combo Module

Type2AB module

## Ultra small, high quality and lower power

Module features channels 5 & 9, low current consumption, and battery life of 10+ years. Ideally suited for small, battery operated IoT devices and applications.

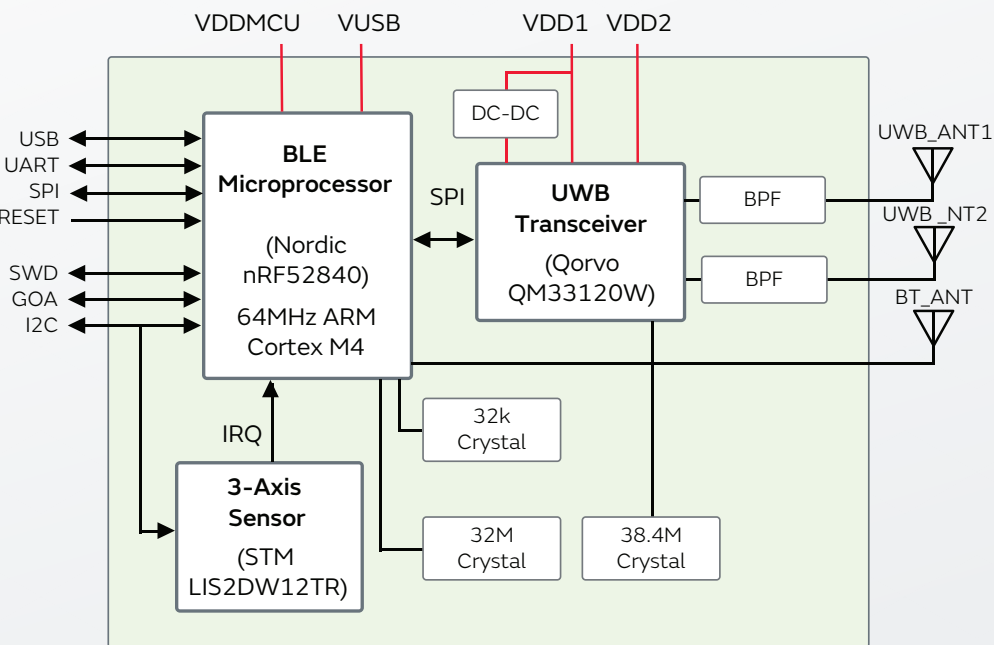

### Features:

- Interface : USB,UART,SPI, I2C
- IC P/N: Qorvo QM33120W
- Hostless module Integrated Nordic IC / nRF52840 which also have BLE function for waking up UWB and updating FW
- Integrated 3 Axis sensor for saving battery
- Work with CR2032 battery
- Reference clock embedded
- Package: Resin mold
- RoHS: This component can meet with RoHS compliance

### Benefits:

- Smallest/highly integrated UWB module available in the market
- 75% less square area than CoB solution
- Frequency, Tx power and Antenna delay are calibrated for each device
- Support Multi Antenna design and evaluation

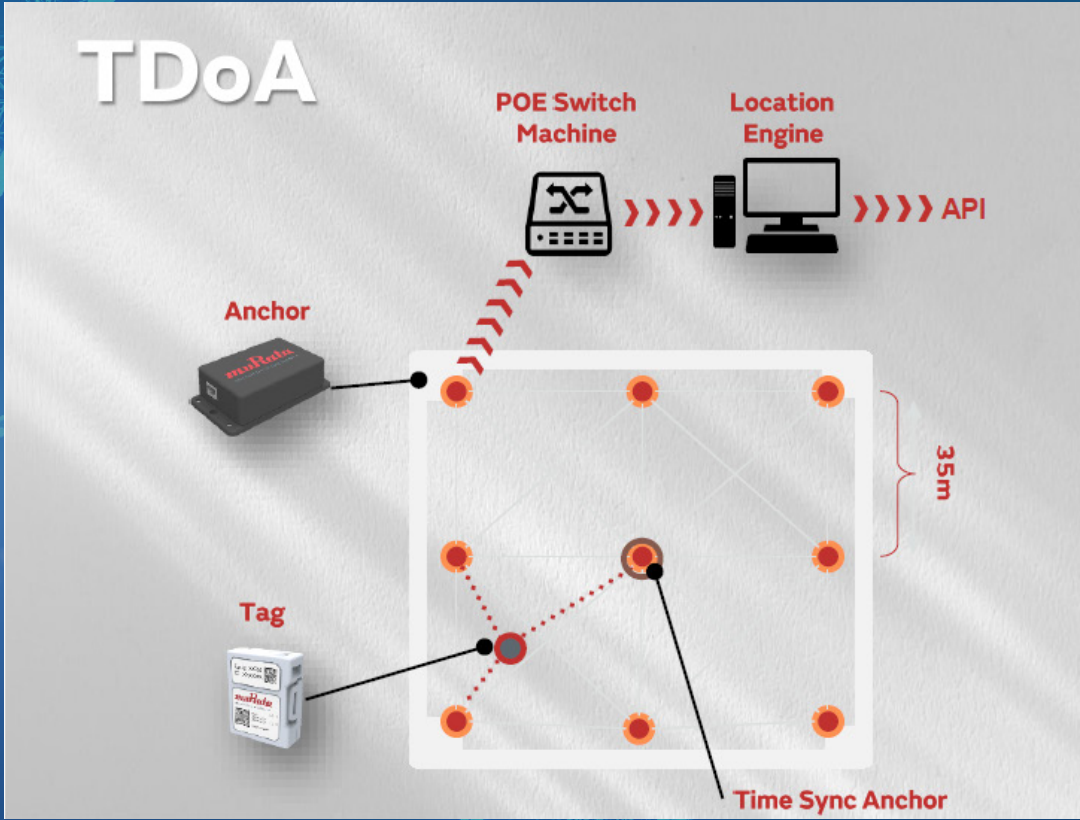

|                       |   |

# Ionizer - Ozonizer

Ionissimo, modules for air purification

## IONIZER

Small, low-voltage ionizer

The Ionissimo can effectively generate ions for a comfortable environment

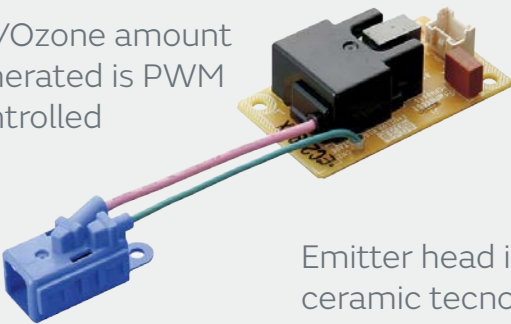

- Ionizer's Ions clean the air dust (PM2.5) and keep moisture on the skin.
- Ionizer's Ions remove static charged from objects.
- Ionizer's ozone kill virus/bacteria, sterilize any surface and prevent odor.
- Ionizer's ozone keep vegetable/fruits stay for long life and increase Vitamin.

| Items   | Parts number                 | Input voltage | Ion amount at 20cm | Ozone density |
|---------|------------------------------|---------------|--------------------|---------------|
| Ionizer | MHM305 series                | 12Vdc         | -5Mpcs/cc          | 0.04mg/h      |
|         | MHM306 series                | 12Vdc         | -5Mpcs/cc          | 0.6mg/h       |
|         | MHM314 series                | 12Vdc         | -8Mpcs/cc          | 0.1mg/h       |
|         | MHM400 series <sup>(*)</sup> | 12Vdc         | +5Mpcs/cc          | 0.1mg/h       |
|         | MHM402 series                | 230Vac        | -4Mpcs/cc          | 0.4mg/h       |

\*MHM400 series is for static eliminating application. If you would like to use other application, please contact us.

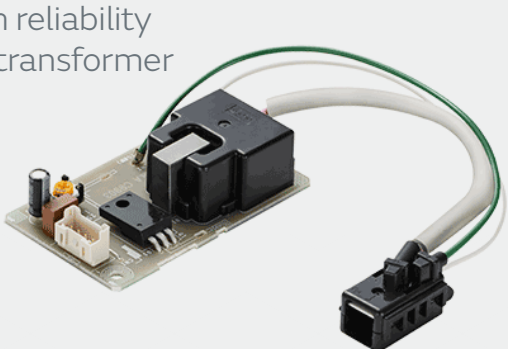

## Technical Specification

Ion/Ozone amount generated is PWM controlled

Emitter head in ceramic technology

High reliability HV transformer

**POWER**  
0.6W to 4.6W

**WORKING TEMP**  
-10~70°C

**WORKING HUMIDITY**  
20~95%RH  
(no condensation)

## ACTIVE OXYGEN MODULE

Small, low-voltage ozonizer

Active Oxygen module will help you to create clean space

- AO module's ozone kill virus/bacteria, sterilize any surface and prevent odor.
- AO module's ozone clean water and sterilize it.
- AO module's ozone keep vegetable/fruits stay for long life and increase Vitamin.

Reduce **90.5%** virus after 20min with very low ozone density **0.1ppm**

| Items                    | Parts number                         | Input voltage | Ozone density |
|--------------------------|--------------------------------------|---------------|---------------|
| Active Oxygen (Ozonizer) | MHM500-00A                           | 12Vdc         | 1.1mg/h       |
|                          | MHM501-00<br>( High reliability )    | 12Vdc         | 1.0mg/h       |
|                          | MHM502-01A<br>( High density Ozone ) | 12Vdc         | 45mg/h        |

## Applications Examples

**Air Conditioner**  
Clean air from dust and smell

**Air Purifier**

**Refrigerator**  
Sterilize refrigerator and improve food freshness

**Dishwasher**

**Circulator and Electric fan**

**Washing Machine  
Dryer Machine**  
Sterilize clothes and dish, preventing mold

# Ionizer

MHM330 series can reduce static electricity quickly

MHM330 series (Ionissimo) will be ultra small size and generate positive and negative ion with auto-balanced function (Patent protection)

## Features

MHM330 will help you for statics electricity problem.

- Auto-balanced for +/- ion (Patent protection)
  - (1) Very quick elimination for positive & negative statics electricity
  - (2) Keep to closed “0Vdc”
  - (3) High reliability due to auto balanced technology
- It’s possible to clean ion head

## Specification

- Dimension:  
53(L)×21.3(H)×36(W) mm (Power unit )
- Rating:  
Input voltage: 12Vdc +/- 10%  
Power: 1.6W typ.  
Generating: Positive ion and Negative ion with auto-balanced function

## Principle for very quick statics elimination

# Microblower

## Air Pump

Murata offers compact, high-performance air pumps that utilize the vibration and deformation characteristics of piezoelectric ceramics.

### Applications

- Blood Pressure Measuring (Smart Watch)
- Breast Pumping Device
- Asthma (Gas) sensing
- Endoscope (lens defogging)
- Suction pump
- Diffuser pump

### Features

- Small and Thin size (19mm / Thickness : 2.3 mm)
- High Air performances  
( Pressure: 50kPa / Flow rate: 1L/min)
- Allow pumps to be used in quiet environments
- Comfortable pumps even when worn
- Smooth supply with discharge without pulsation

# Linear Resonant Actuator

(LRA)

High output and customized vibration frequency  
“Linear Resonance Actuator”

### Applications

- Replacing sound notification devices in noisy areas
- Power may be increased to obtain strong vibration
- Vibration actuator with features that can be used outdoors

### Specifications

|                             |                        |                   |
